340B Data Service

Converting Needs Into Solutions

The TSO has developed turn-key solutions for automating NextGen / Allscripts 340B data extractions.

Features:

- Assist in setting up FTP data file transfer to any third party 340B vendors.
- Work closely with clinic in customizing 340B data extractions.
- Compatible with any Microsoft-based EPM/EHR system (NextGen, Allscripts).
- Competitive one time flat fee rate.
- 3 years free maintenance and support.

> "The Council of Community Clinics San Diego took over the process for streamlining our 340B information transmitted to our pharmacy. This was a great timesaver for me as I knew I could trust their expertise and they kept me informed via email as to the progress. The process was smooth and very efficient. "

Susan Dion, COO
Valley Community Clinic
