

DIABETES OUTCOMES

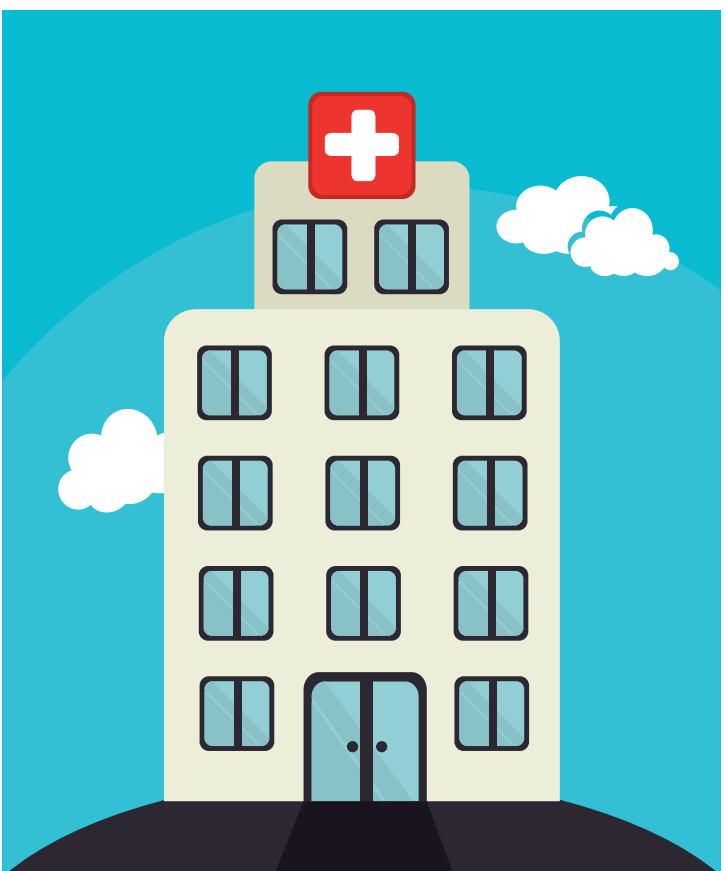

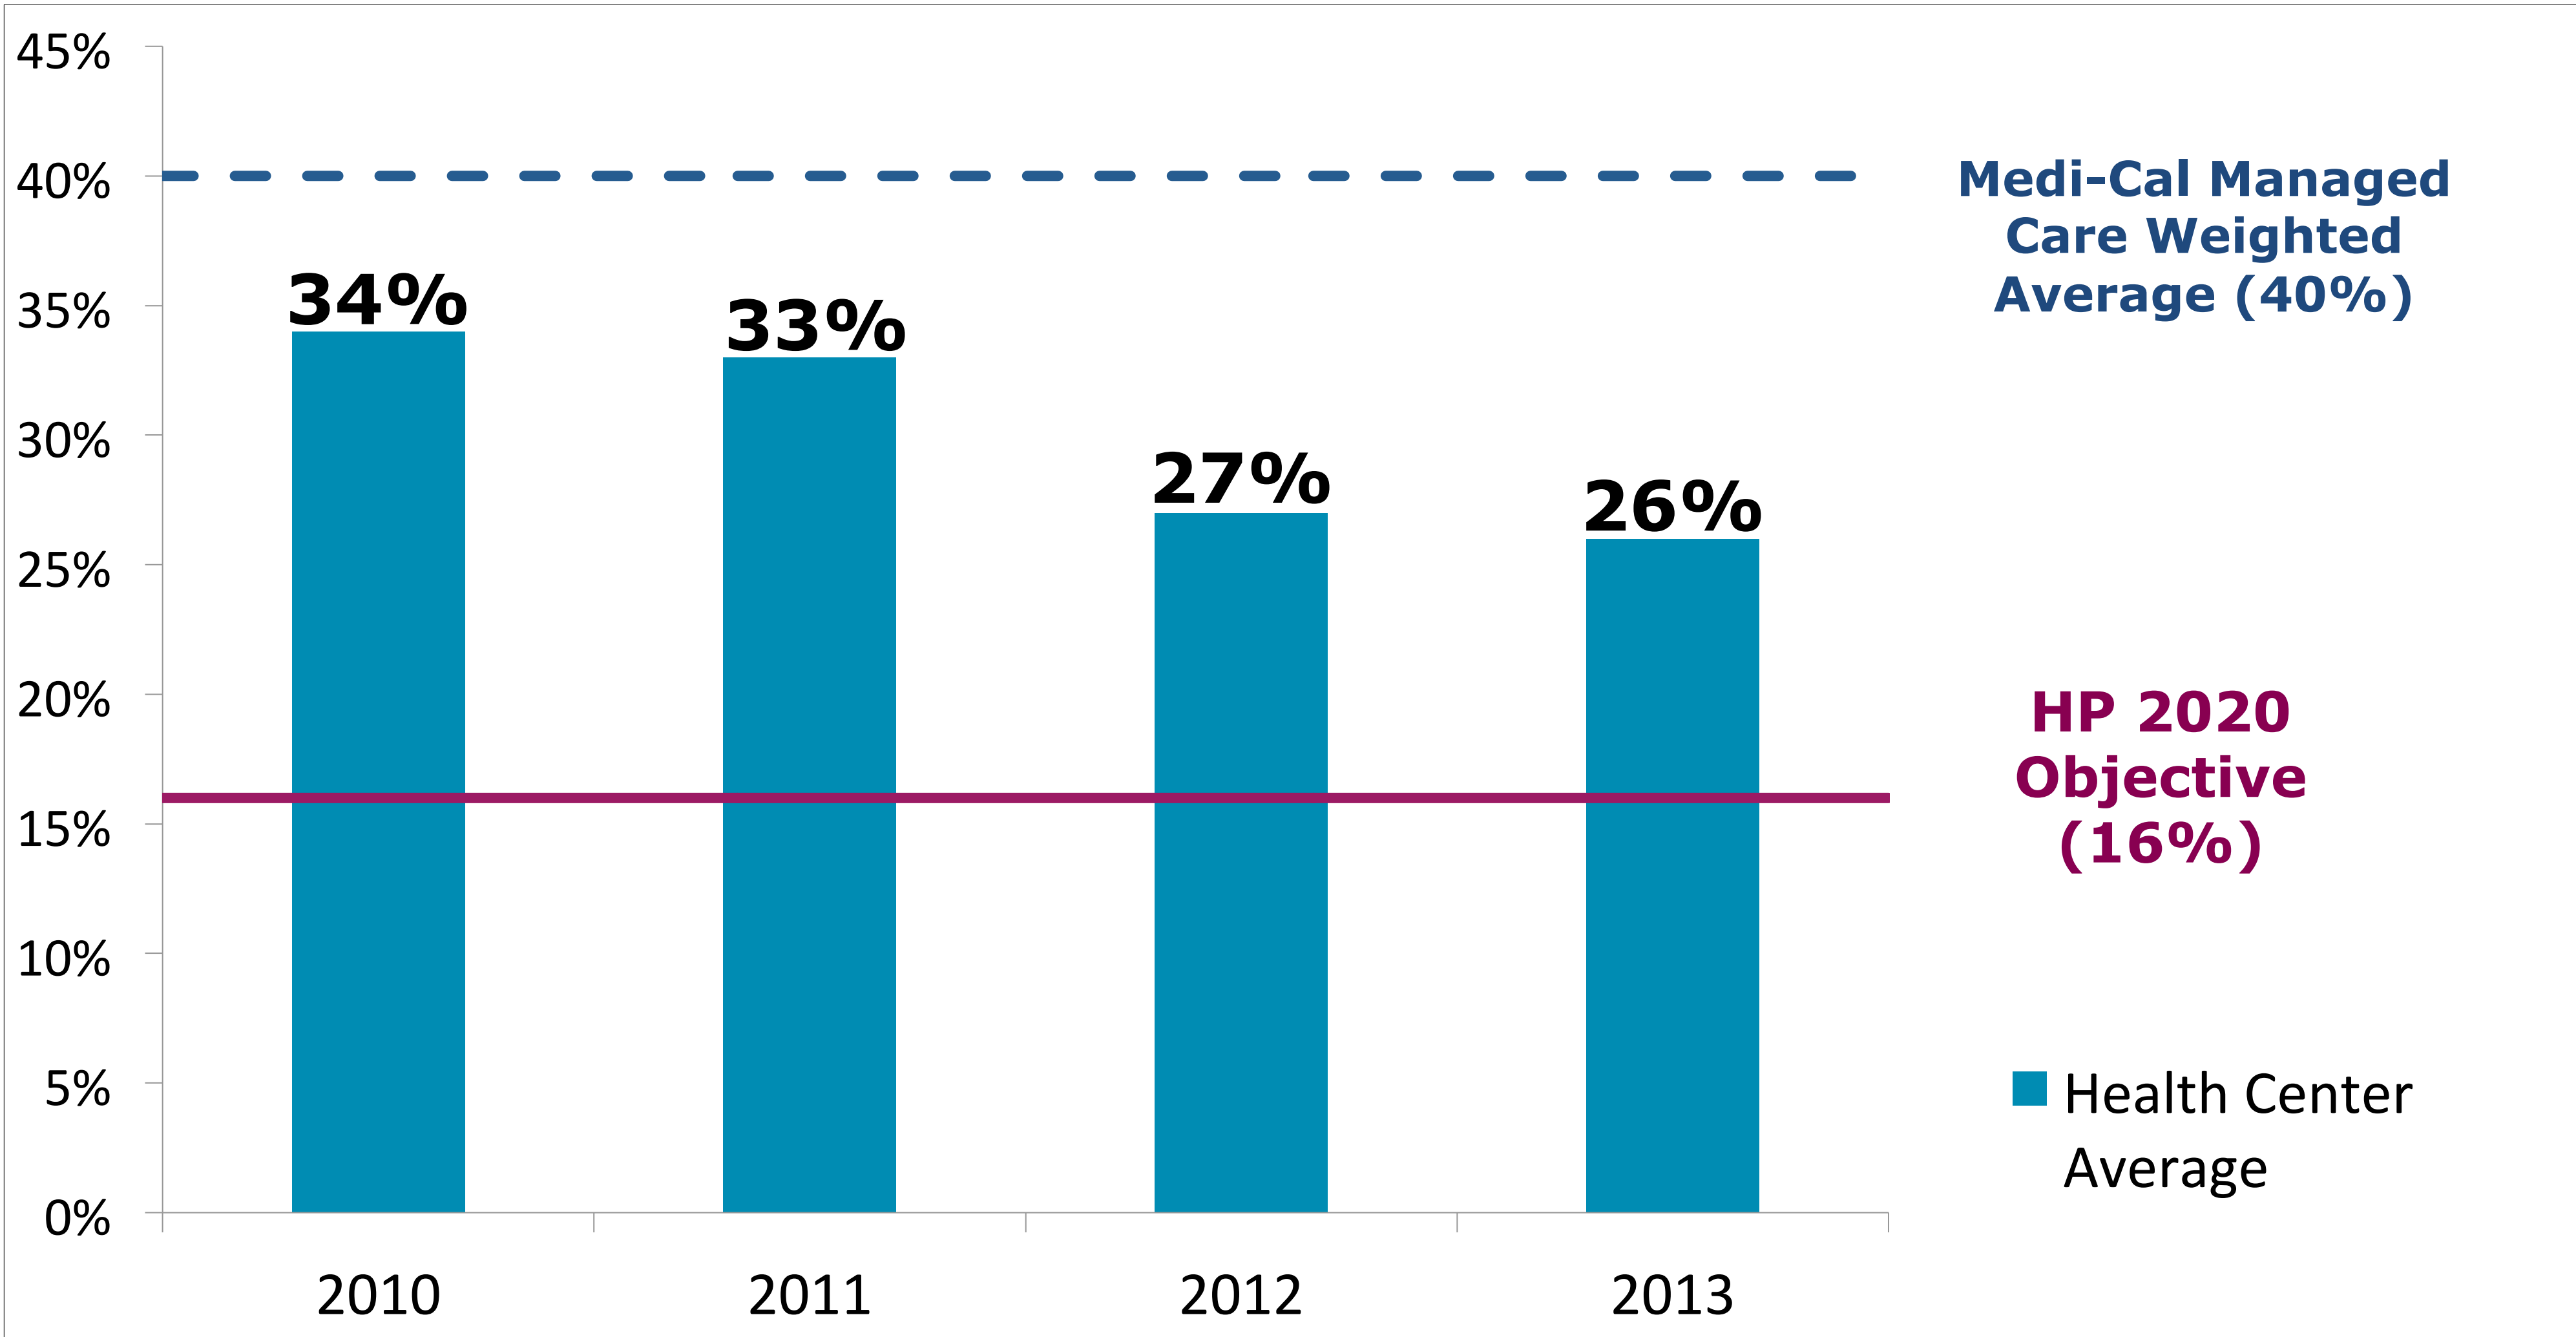

Community Clinics and Health Centers in San Diego and Imperial Counties

Our member health centers are steadily reducing the percentage of patients with poor control of diabetes or “no test.”

Percent of Patients with Poor Control of Diabetes (HbA1c>9%) or No Test

Lower Bars Indicate Better Performance

In 2013, 93% of Health Centers (13 of 14) did **BETTER** than the Medi-Cal Managed Care Weighted Average for diabetes control.
