

VALUE IMPACT of HEALTH CENTERS

Health Center Partners of Southern California

Nine Federally Qualified Health Centers (FQHCs) and other safety-net clinics provide care to residents of **California's 50th District**. They collectively provide tremendous value and impacts to their communities—from ACCESS to care for vulnerable populations; SAVINGS to the health care system; JOBS and ECONOMIC STIMULUS to local communities; STATE-OF-THE-ART, COMPREHENSIVE, COORDINATED CARE, with a focus on CHRONIC DISEASE MANAGEMENT and QUALITY HEALTH OUTCOMES. Highlights of their **2016 contributions** are shown below.

*Full-Time Equivalent (FTE) of 1.0 means that the person is equivalent to a full-time worker. In an organization that has a 40-hour work week, a person who works 20 hours per week (i.e. 50 percent time) is reported as "0.5 FTE." FTE is also based on the number of months the employee works. An employee who works full time for four months out of the year would be reported as "0.33 FTE" (4 months/12 months).

HOW ECONOMIC IMPACT IS MEASURED

Using IMPLAN, integrated economic modeling software, this analysis applies the “multiplier effect” to capture the direct, indirect, and induced economic effects of health center business operations and capital project plans. IMPLAN generates multipliers by geographic region and by industry combined with a county/state database. It is widely used by economists, state and city planners, universities and others to estimate the impact of projects and expenditures on the local economy. This analysis was conducted using 2015 IMPLAN Online.

WHAT ARE DIRECT AND COMMUNITY IMPACTS?

Direct impacts result from **health center expenditures associated with operations, new facilities, and hiring.**

Community impacts can be indirect, resulting from **purchases of local goods and services, and jobs in other industries.**

Community impacts can be induced, resulting from **purchases of local goods and services at a household level made by employees of the health center and suppliers.**

A health center purchases medical devices from a local medical supply store.

The medical supply store purchases paper from an office supply store to print receipts and hires a local delivery service to transport the medical devices.

As local industries grow and household income increases, employees of the health center, medical supply store, office supply store, and delivery service spend their salaries in the community.
