

Treating Patients with C.A.R.E

An Interactive 4-Hour Training Workshop

The Treating Patients with C.A.R.E curricula has been designed to enhance health outcomes by supporting every staff member to be full members of a health care team. What staff members do affects important issues like whether patients make appointments, keep appointments and communicate their concerns completely. This program helps all staff to be able to impact what is within their span of control – how they communicate.
