Council of Community Clinics needs you to help get the word out to every policymaker, and American ---

Protecting & investing in Community Clinics & Health Centers is a solution to many of the problems still challenging the future of health care in America.

In our region alone, our health centers serve over 720,000 patients and are prepared to serve tens of thousands more if adequate resources continue to be available.

Nationally, we save the health care system billions of dollars – many times the money invested in the program.

**CAMPAIGN FOR
AMERICA'S HEALTH CENTERS**

Why Join This Campaign?

Community Clinics & Health Centers are facing an unprecedented threat this year – a potential 70% reduction in funding scheduled to take effect in 2016.

We have to make sure valuable programs, like Medi-Cal remain intact and strong.
