

Planned Parenthood of the Pacific Southwest

We're More Than You Think

We provided comprehensive sexuality education to 40,000 people in our community last year. We served about 150,000 patients last year throughout our 19 health centers. 95% of all of our services are preventive, including about 1/3 of our patients receiving a broad range of STI testing and treatment.

- We're cervical health specialists and provide hundreds of colposcopies and LEEP procedures every year.
- We provide a variety of long-acting reversible contraception (LARC) as well as vasectomy, Essure® and bilateral tubal ligations for our patients.
- We provide safe, compassionate abortion care.
- We work with women and men to discuss and help meet their intentions and plans around their reproductive and life goals.
