

Vista Community Clinic

Meet some of our patients who "Choose Health" ...

Kylyn began coming to VCC when she was a baby. Her pediatrician recommended that she see the dentist beginning at 1 year of age and lucky for her – the dentist was right up stairs!

Michael received same-day medical treatment and assistance in finding specialty care. We are glad to be there for him and thousands of others who lack medical insurance

Even though I didn't have health insurance, the doctors took care of me and I was back to work in no time. My work feeds my family.

When Susie and her mom walked into the clinic, they were welcomed and treated by caring staff. Her mom was relieved to find that even during the family's financial crisis, they still had access to healthcare.
